

How does Crosslisting Work

Cross-listing is the ability to join two or more section together to share content and enrollments. Cross-listing is a concept whereby two or more disparate sections can be listed as one and the same. The common use on campus is that two sections are taught in the same place at the same time by the same instructor.

For example(children) CRN 16957 and CRN 17992 are both instances of the same module and are taught under the course (parent)NAUT7001. If a lecturer is teaching these two modules (16957 & 17992) at the same time, the lecturer has the ability to cross list these two modules so that any content put into the parent automatically gets populated to the children.

To fill out a cross listing request go to <http://www.elearningcit.com/cross-listing>

| | |
|-------------|------------|
| MODULE NAME | Seamanship |
| MODULE CODE | NAUT7001 |
| CRN | 1234 |
| ----- | |
| MODULE NAME | Seamanship |
| MODULE CODE | NAUT7001 |
| CRN | 5678 |

Once you have filled out the form (example above), a member of staff who works with Blackboard will cross-list the modules.

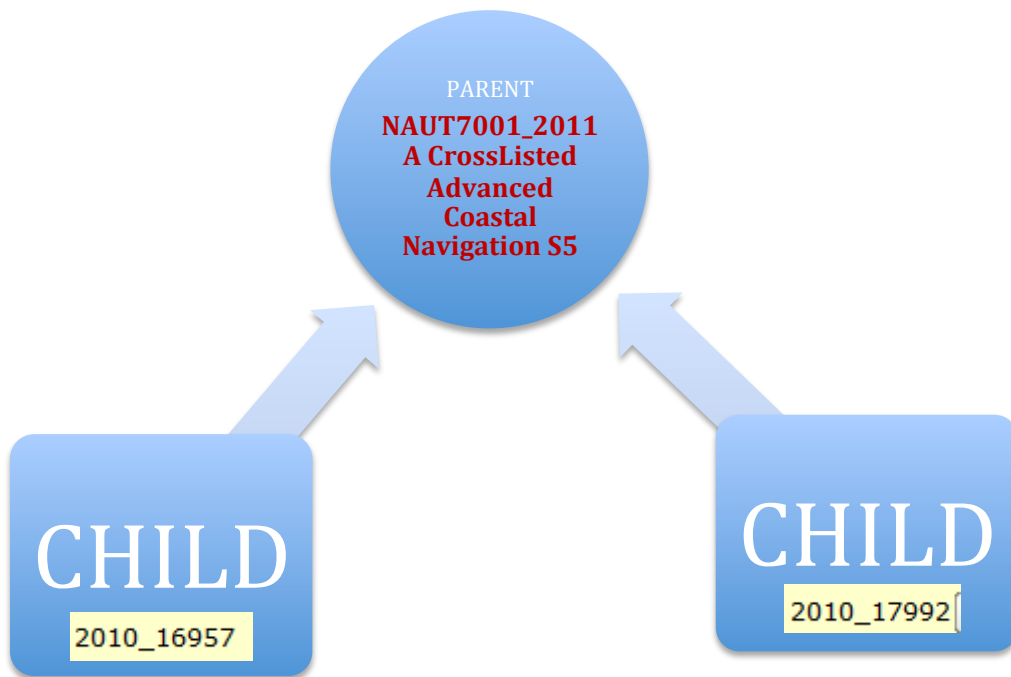

After cross listing has occurred - ONLY ONE OF THE CHILDREN WILL BE VISIBLE ON YOUR BLACKBOARD SCREEN.

Example below:-

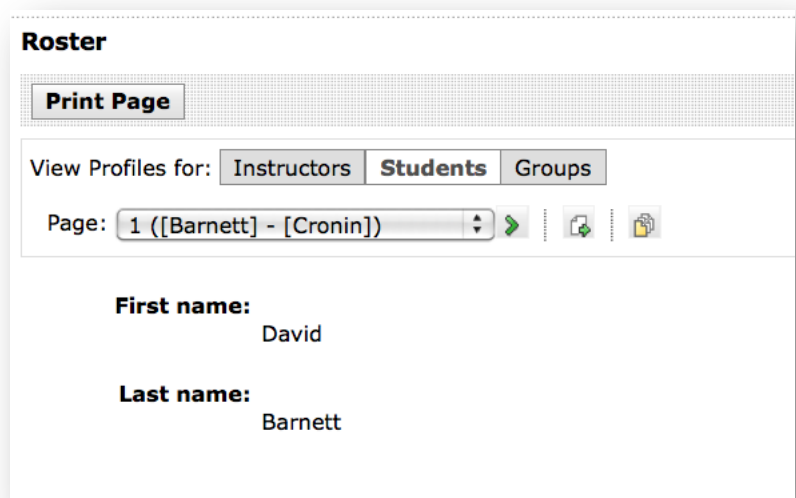

[Advanced Coastal Navigation \(NAUT70011\) - 2010 17992](#)

Section Instructor: Roderick Cooke, Vivion Gough, Peter Walter, Joey Turner

However when you select this course, you will automatically be directed to the parent course. The title of the Crosslisted Course is displayed on the top navigation area

In Blackboard the user can view ALL the students associated with the parent by selecting the Roster under the Teach tab.

To see which students belong to which CRN, you can go to the Grade Book under the Teach Tab.
